## ANTHILL CRM

Anthill CRM is a cloud-based sales automation and customer insight tool for companies of all sizes. Users can monitor all website inquiries, appointments, and installations, and customer activity is presented in a customer history feature. This offers customer contact and progress notes and allows for consistent interaction with customers across an organization.

Automated customer emails and SMS can be personalized with name and location, sent at specified points in the selling funnel, which allows for the nurturing needed to fulfill a sale. This is triggered based on customer behavior, which can be managed in the workflows feature, which not only automates communication to the customer but also informs users when an action needs to be completed.

Customer satisfaction can be monitored within Anthill CRM through analytics, with the option to drill down into the health of leads. With a single click, it is possible to identify those leads that need urgent attention. This can be monitored further through the sales pipeline dashboard, that illustrates data at different stages of the sale.

The Anthill CRM API connects directly to your website and will integrate with a wide range of applications and legacy systems, including Sage, Google Analytics, and WordPress. Packages vary depending on whether you have a single site, multi-site or are a large enterprise. If you choose the multi-site option for 11 – 31 users you will receive free onboarding, training and setup and your own account manager.

## BENCHMARK CRM

Benchmark provides CRM solutions to companies across a wide range of industries. As the company offers its software to charities free of charge, many of its clients work in the not-for-profit sector.

Benchmark CRM is built with ease of use and speed of implementation in mind - the implementation timeframe can be as short as one day, with data migration included as part of the process. The software also integrates with Benchmark's accounting and payroll solutions so that clients can opt for an 'all-in-one' solution if they so choose.

A close feedback loop and an emphasis on strong client relations mean user suggestions are frequently included in new updates. As such, Benchmark can provide bespoke functionality and modifications on demand, with relationship tracking, sales management, marketing and accounting all included as standard features.

Pricing plans are flexible and are based on a per-user, per month subscription basis. Support and additional modules are also available at an additional cost.

## BPM'ONLINE

bpm'online is a process-driven, cloud-based CRM solution for marketing, sales and service automation. It is in use across a number of industries including advertising, retail, financial services, logistics, legal and pharmaceuticals.

bpm'online is designed for sales, marketing, and customer service teams. The system allows users to align marketing, sales, and service on a single CRM platform. Whilst the software is ready to use out of the box, it is also flexible and highly customizable.

A key feature of bpm'online is the ability it affords business users to build their own applications, via a drag and drop interface based on the BPMN standard. This allows non-technical sales staff and business analysts to change processes in the CRM to suit their business requirements. One of the key features of the bpm'online sales module is its engaging interface that allows users to see a 360° customer view of the sales process. It also incorporates forecasting, leading and opportunity management and reporting.

bpm'online is available in three packages, each designed for businesses of different sizes; Team, Commerce, and Enterprise. The sales, marketing, and service modules are available separately or as a single, integrated bundle. bpm'online pricing is based on a per-user, per month basis whilst the cost of implementation is calculated separately.

## BUDDYCRM

BuddyCRM is a CRM package aimed at medium sized sales teams in mid-market organizations. It is designed to be customizable and easy to use, without the need for third-party consultants or extensive training.

One of BuddyCRM's key features is its collaborative approach to sales. All sales activity, meeting notes and opportunities are stored in a central location, accessible by sales managers and authorized members of the team. Its marketing suite offers two distinct prospecting options, allowing sales teams to target potential sales en masse or individually. The software can be integrated with third-party or in-house software via the Buddy API.

The 'Buddy Dashboard' acts as the central hub for BuddyCRM, from which users can access the software's features. A customer view displays prospects and interactions on a single screen, with client information readily available. Other features include opportunity and pipeline management, email marketing and quotation generation.

BuddyCRM is a cloud hosted CRM solution, accessible online or via an iOS mobile application. Buddy Awesome, the standard package, comes with the entire set of Buddy features while Big Buddy offers companies an extra 750MB of storage per user and double the bandwidth per month. Pricing is structured on a per-user, per-month basis and all packages come with telephone support.

## CENDYN CRM SUITE

Cendyn CRM Suite is a range of CRM solutions designed for use in the hotel and hospitality industries. The company offers separate CRMs for boutique hotels and multi-property - Guestware serves the independent and boutique hotel market, whilst elnSight covers companies with multi-property or multi-brand needs.

Both solutions offer a full set of marketing automation features and hospitality-specific functionality like guest profile management, TripAdvisor integration, and guest satisfaction surveys. Advanced analytics tools offer users the opportunity to view travel data and use it to inform marketing strategy.

When combined with the Hotel Sales Suite, these are enhanced by RFP response tools for group booking response, a digital menus tool and collaboration tools for event management. A corporate events suite is available alongside this with full integration; this expands Cendyn's CRM suite with financial management, sourcing, attendee management and supplier communication features.

The Cendyn CRM Suite is cloud-based, so can be accessed from any device with a browser installed; there's also a web app to facilitate use on mobile devices.

## COMMENCE CRM

Commence CRM is a sales, marketing and project management CRM designed for small to mid-sized organizations.

The Commence CRM sales management features allow professionals to monitor sales activity, manage leads and improve sales forecast accuracy, whilst marketing features include campaign management, budget optimization, and web-based lead forms. Customer service functionality is also offered, through ticket management and RMAs, as well as a knowledge base and an FAQ feature.

Away from sales and marketing, there is also a project management tool within Commence CRM. This allows for the management of tasks, files, resources, and expenses. There is also the option for real-time collaboration through the platform, where there is access to all your data for the efficiency of discussion about projects. There is also the option of a customer portal, email integration, QuickBooks integration, as well account and contact management.

Commence CRM is available on-premise or in the cloud, with pricing for both options based on an annual SaaS model. There are three levels of support available: self-service; email and telephone support and professional services support. This final level of support is customized to the needs of each business. This could include data migration; instructional training; third party integration or implementation of best practice.

## COMPANYHUB CRM

CompanyHub is a cloud-based CRM with an emphasis on customization and flexibility. Users can customize their interface using a simple drag and drop of fields. From this, you can further customize the types of tables and forms you produce, the reports and the business intelligence you receive.

The software is available to adapt to most sectors. The automotive industry can benefit from quotes, commissions and incentives, scheduled payments and loan disbursements; the manufacturing industry can manage product lists, prices and quotations and orders; travel sector with itinerary management, suppliers and bookings; and much more.

The software works to minimize data entry by importing leads, syncing with emails and the sending of bulk mail. It also gives a full view of leads, showing information, emails, notes, and tasks at a glance. It will allow you to set up follow-up dates with assigned tasks or change the strength of the contact on the contact dashboard, and provides visibility for sales progress, allowing you to set up different stages of potential deals. There is also an easy reporting function.

CompanyHub allows you to try all functions of the software during a free trial, and from this, you can set up the plan that best suits your business and your budget. The organization module is free for up to 10 users and allows you to manage leads, customize the sales pipeline, and for use on a mobile app. Productivity and insights come at a monthly subscription price, with automation included for at a higher pricing point.

## CORETRAC

CoreTrac is Aptean's CRM software solution designed specifically for financial institutions with over \$50m in assets. CoreTrac's aim is to break down silos and create a personalized customer experience that is consistent across all departments and communication channels.

The finance specific platform offers features such as a profitability tracker, which enables users to actively monitor and evaluate their most profitable clients. An ad engine allows users to generate ads in real-time to capitalize on clients' behaviors and a lead capture tool automatically manages requests from visitors to the users' websites. Coupled together, this allows users to make targeted financial offers, such as a loan or credit card offer, to visitors to their site in real time.

Integration with existing business software is another facet of CoreTrac's CRM solution, for example, the reports generator can be used with all SQL databases to create custom reports. Other core features include client, lead and referral management that allow users to establish referral queues based on product, role, and department.

Aptean offers a choice of deployment options for CoreTrac, allowing clients to host the solution on premise or on a dedicated cloud. Similarly, clients can choose a SaaS pricing model or 'Respond', a role-based access model that allows clients to pick only the features they require at the lowest price.

## DAYLITE CRM

Daylite is Marketcircle's CRM solution, designed specifically for sales teams who rely on Apple products to conduct day-to-day business.

Geared towards entrepreneurs and small teams, Daylite integrates customer relationship management, scheduling, sales and project management into a single iOS native application. The solution provides 'anywhere and anytime' access via Apple devices with data available offline at any time.

A key feature of Daylite CRM is its advanced contact management functionality, which allows users to link people together in a 'spiderweb of connections'. A database of contacts is enhanced with information on previous employers, spouses, colleagues and suppliers giving a user the full picture of their customers' network. Daylite also boasts a client interaction history tracker, smart task management and seamless integration with other native iOS features such as FaceTime.

The pricing plan is structured on a per-user basis, with discounts offered for annual subscriptions. Both cloud and on-premise packages are available. Custom integrations with the Daylite CRM are allowed via the web-based API, and other popular workflow applications such as Zapier are possible with the cloud-based package.

## DEBTPAYPRO

DebtPayPro is a CRM platform designed to facilitate a range of financial needs and processes, including debt settlement, credit repair, practice management, student loan consolidation and more.

DebtPayPro offers a host of finance-specific features, such as settlement forecasting, dispute letters and internal and external attorney management. Alongside these, DebtPayPro offers a solid range of core CRM functionality like lead import, email marketing, and task automation. One particularly useful feature of DebtPayPro is the sales script builder, which allows users to optimize time on the phone for information gathering.

DebtPayPro also offers a considerable range of finance-specific integrations - these include payment gateways (13, including PayPal, USAePay and FedChex), credit and finance bureaus, and merchant account providers. Alongside these, users can benefit from integration with more general solutions, including nine phone systems, electronic signature providers (DocuSign, clixsign and Adobe Echosign), Slack and Zendesk.

DebtPayPro is a cloud CRM offered on a SaaS 'per user per month' pricing model. Implementation takes between five and seven business days.

## FRESHSALES

Freshsales is sales and customer service tech provider Freshworks' CRM offering. It integrates phone and email so that calls and emails can be sent directly from the platform, which allows sales teams to streamline prospect communications. Communication is also made more efficient by the email alerts, which tell you when an email is opened and when the customer has clicked on a link.

Freshsales offers strong analytics and reporting functionalities which offer insights on sales-ready buying signals and behaviors, so sales teams know when to act for the best outcomes. The analytics also show prospects' engagement level, context, and online behavior, to help make conversations with future customers relevant to their interests and needs.

As well instigate sales conversations, Freshworks helps to manage the sales pipeline more effectively. It tracks the progress of deals and gives your professionals chance to add tasks, set up meetings and contact the customer from their individual deal card.

Freshsales CRM comes in four packages: sprout, blossom, garden, and estate. The 'sprout' package is free, and users can scale up as their company needs. The most basic package offers basic reporting, built-in communications and iOS and Android app. The most advanced 'Estate' package offers a reports dashboard, advanced customization, rules-based lead scoring and segment integration.

All the Freshsales plans include 24/ 7 email support and 24 hours, 5 days a week phone support.

## GOPHER LEADS

Gopher Leads is a platform specifically designed to help frontline employees generate and manage leads, the CRM operates a strong gamification element - users are rewarded for delivering useful business intelligence and contributing to company goals.

Gopher Leads follows a three-step process. First, leaders set up campaigns that define what employees should be looking for. The system finds possible new sales leads and potential up-sell opportunities. The aim is to keep the whole team informed and engaged in the campaign. Second, it helps you to gain intelligence - all data captured by employees is easy to report and record with an easy-to-use mobile app. This is then organized in the system and accessible by all employees as a resource to act on. Finally, the Gopher Leads platform offers the opportunity to reward employees for generating the kind of business intelligence that you need for lead generation.

Alongside these BI and lead generation features, Gopher Leads offers a fully-featured CRM which integrates with larger CRM and email clients like Gmail and SalesForce. 'Smart Lead Routing' ensures that each of your sales team receives appropriate leads. All information about potential leads is geotagged and data can be uploaded as audio or visual, as well as text entry.

Available on the cloud as an iOS, Android or web app, the platform is implementable within a day. A monthly subscription gives access training and continued online and telephone support.

## GREENROPE CRM

Greenrope CRM is a cloud-based software package that combines CRM and marketing automation. The software is aimed at small to medium-sized businesses who want to combine their CRM package with up-to-date marketing technology on a flexible, no-contract basis.

The CRM is divided into three 'suites' - Sales, Marketing, and Operations. Each focuses on a different business area to provide an all-in-one approach to running a business. Greenrope claim to be the world's only complete CRM that brings together event management, website hosting, and email marketing together with other more standard CRM functionalities.

Web analytics are a key feature of the Greenrope CRM package and among them is an A/B split testing facility, which allows users to deterministically optimize their websites. The attribution modeling feature gives users the ability to evaluate the most lucrative sources of their clients. VoiceBase adds automatic transcribing functionality and a 'cold-automation' feature allows users to automatically trigger workflows based on their clients' inactivity.

Unlike many CRM packages, Greenrope's pricing model is not based on a per-user, per-month model. Instead, Greenrope has an initial account setup fee (\$399, or \$499 for a 'premium' account with added consulting time included) and then charge based on the number of contacts stored in the software. Windows, Linux, Android and Apple mobile applications are all available.

**HATCHBUCK**

## HATCHBUCK

Hatchbuck is a CRM with a fully-integrated marketing solution designed for SMBs. The fact that it is not 'patched together' avoids the common problem of incompatibility when IT infrastructures are modular and built incrementally. Hatchbuck aims to prevent all the compatibility problems between CRM and marketing software by delivering it all in a single package.

As a small business CRM, Hatchbuck allows users to grow their customer base through small DIY systems that manage the sales funnel with you. It helps manage marketing campaigns via email, giving you a complete story of your contacts and providing useful templates for contacting them. One of the most attractive features of the software is the marketing automation it offers, with easy to set up intelligent actions and notifications that keep your marketing and sales on track.

Other major features include the ability to manage contacts, automate follow up through drip campaigns and autoresponders and track success through the analytics dashboard, which provides insights into sales and marketing data. As a cloud solution, Hatchbuck can be accessed through any device with internet compatibility.

There are several packages you can choose including small biz; team; professional and enterprise. The cost varies depending on the number of users, contacts, and emails. All packages come with a Quickstart Package, which includes: a marketing strategy overview, one hour of training from a dedicated consultant, a branded newsletter template, and one pre-built email campaign. This can be upgraded to Quickstart Pro for a small cost and you receive three hours of training and three pre-build email campaigns, as well as a customized sales and marketing process mapping.

## HAYSTACKCRM

HaystackCRM developed a mobile app for our CRM that is full featured and interactive with a simple, clean look. Our goal is to reduce the workload of a sales team by providing a platform to enter data in the moment, quickly and easily. We set up HaystackCRM to focus on customer relationships instead of only a pipeline view. The contact overview has the information that you can see in a glance, including what open opportunities or appointments are coming up. You can add multiple opportunities or deals to a contact, including: quotes, building your relationship with the prospects, leads or customer, not tracking single deals. Another advantage of our mobile platform is offering features like mapping, not typically found in a CRM.

## HEADSHED CUBE

Headshed Cube CRM is a platform that integrates sales telemarketing and call center information with traditional CRM features, combining customer service management with the performance of sales teams. One of the platform's main focuses is on a simple interface and single-click functionality - the CRM is designed to be as intuitive as possible for users.

Headshed Cube works to log data and present models of relevant information in a way that can inform future actions. The CRM can also create call lists, which can be segmented to improve efficiency. Headshed Cube provides options to manage marketing campaigns and segment customers in real-time, this helps CRM users to be flexible and make adjustments instantly. This function allows for trends following the launch of a marketing campaign to be identified instantly, these trends can be based on factors such as geographical areas, salesperson performance and what the typical customer looks like.

Headshed Cube CRM is billed to be the "complete sales vehicle". Its features include a solid selection of standard functions such as campaign management and live tracking, and there are some extras such as open integration with other commonly used software platforms and call recording.

Headshed Cube is a cloud-based CRM and has a native web app for when users want to access the system remotely. Pricing is based on a per-month SaaS mode, and potential clients can make use of a free trial before purchase. User training, implementation support, and consulting services are available.

## HUBSPOT CRM

HubSpot CRM is a free, cloud-based CRM package developed for companies who either use or are planning to use inbound marketing techniques. It is suitable for small to medium sized businesses with established or growing digital presences.

HubSpot CRM emphasizes ease of install and intuitive interface. Inbound marketing is the central theme to HubSpot and so integration with the other HubSpot packages (Marketing and Sales) is a major feature of the CRM software. HubSpot will also integrate with Google Apps and Microsoft Outlook to automate administrative and documentation tasks.

One of HubSpot CRM's major selling points is that its core features are free for an unlimited number of users and storage space. Interaction tracking, activity logging, and a pipeline dashboard are all included in this as does integration with the HubSpot Sales packages. Professional package features like sales automation and prospecting tools can be bolted on for a fee.

HubSpot is a web-based CRM and so can be accessed via any device with an internet browser installed. Native Android and iOS mobile apps are available.

## LEADSCORE

Leadscore is a CRM that simplifies the process of moving between sales and marketing. The CRM can switch between sales and marketing mode, allowing users to access the specific functions features you need from within one platform.

The sales mode allows users to manage the sales pipeline with a number of tools. These include lead scoring and deal pipelines; allowing you to drag and drop prospects into the stage of the pipeline they reside. Leadscore includes auto data entry when you call, email or make a note on a contact, then the reports function creates a digestible view of team activity.

The marketing mode within Leadscore helps you to design and manage your email and drip campaigns. The CRM will provide analytics data to support and inform your marketing decisions. The marketing mode will also track your website metrics, offering important insight into the interaction of customers with your brand.

Leadscore offers telephony integration alongside a sales dialler, which allows you to make calls from within the software. Elsewhere, the software integrates with a number of tools, including G-suite, MailChimp and Zendesk.

Leadscore offers a bronze, silver, and gold monthly package available, with all prices based on an SaaS model. Leadscore is a cloud-based CRM, and offers native mobile apps for iOS and Android, allowing users to manage sales and access data whilst traveling.

## MICROSOFT DYNAMICS 365 FOR SALES

Microsoft Dynamics 365 for Sales is a software solution system designed to improve business operations through predicting customer needs, build customer relationships and revenue.

A customer-focused CRM, Microsoft Dynamics 365 for Sales is suited to companies looking to build customer loyalty and trust through personalized experiences by creating end-to-end, outcome-focused journeys that engage at the right time and place. A context-based system allows users to determine the most appropriate interaction on an individual basis, essential for businesses where customers require a more tailored approach.

Full integration of Microsoft software systems allows for effective management of customer relations at all levels, with immersive Excel, embedded OneNote, and Microsoft Dynamics CRM for Outlook, productivity improvement is a major focus of the product. A flexible and intuitive user interface is used throughout Microsoft Dynamics 365 for Sales, making navigation through systems simple in order facilitate a focus on customers rather than administrative tasks.

Microsoft Dynamics 365 for Sales is available as an on-premise and cloud based software depending on business needs, with native mobile functionality for Android, iOS, and Windows phones.

## MOTHERNODE CRM

Mothersnode CRM is a cloud-based platform offering sales & marketing automation within an “all-in-one” CRM. Cloud access to Mothersnode CRM enables retrieval of historic customer data on mobile platforms, wherever communication with the customer takes place.

The CRM is sold on its ability to convert more leads into sales by streamlining processes and cutting out inessential steps that slow interactions. The software allows you to integrate all practices that would have been carried in separate spreadsheets, word processing, and email software. Mothersnode CRM also allows for a file sharing and management, increasing efficiency and reducing the risk of user error.

There is the option to use modules for analytics and customer segmentation, helping to streamline sales and marketing efforts. Communication with customers can also be standardized and automated through nurturing emails.

Mothersnode CRM is built using a series of core modules which can be extended out into other areas of the business, such as analytics and customer service management. The CRM software is managed from a real-time, customizable dashboard, and integrates with Outlook and Gmail. API access to Mothersnode CRM is also available.

[VIEW COMPLETE PROFILE](#)

## NETHUNT CRM

NetHunt is a CRM designed to be used as part of the G-Suite from Google, the CRM integrates with Gmail and other Google apps. A web based CRM, it is suitable for companies of any size.

The concept behind NetHunt CRM is quite simple. NetHunt CRM turns emails into records. These records allow the user to manage their tasks through their email inbox. The company calls this a “smart inbox”. Relevant customer and lead data is together stored with the email and the CRM allows project managers to set up mailing campaigns and organize customer support. The CRM can also help streamline of basic human resource management procedures.

The NetHunt CRM interface is a simple extension of the email inbox and is therefore web-based. When an existing client makes contact, a record of interaction is shown beside the message. This includes details of products or services bought, as well as who in the company has previously dealt with the client. The CRM also allows users to produce sales pipeline reports for an individual sales person or for the whole company. NetHunt CRM software can also track email opens and is fully customizable.

All potential clients can take advantage of a free, no commitment trial before purchase, and NetHunt offers free support and onboarding. If purchasing a package for more than 100 users companies are advised to work with the support team from NetHunt, who will help implement the CRM. Like deployment of the software, training, and support is also offered online.

## NETSUITE CRM

NetSuite CRM is a cloud-based solution suitable for organizations of all sizes, although medium to large sized sales teams will likely benefit particularly from the management, compensation, and KPI features.

NetSuite software incorporates traditional CRM features such as SFA and marketing automation with sales performance, order management, and e-commerce capabilities. It aims to give users a '360-degree view' of their customers so that sales teams can close more deals and provide better service, hence a strong focus on analytics. A flexible compensation calculation engine comes as standard, as do automated reporting tools.

A key feature of the NetSuite CRM package is its advanced sales forecasting and quota management tool. Probability-based forecasting coupled with an order management tool allows users to evaluate opportunities and pending orders automatically or in real-time. The marketing suite includes email automation, lead capture and interactive reports that allow users to drill down on individual aspects of a campaign.

NetSuite CRM integrates the NetSuite e-commerce package as well as third party software such as Microsoft Outlook and Google Apps. The platform is accessible via any internet browser or iOS and Android mobile apps. There is also a developer platform that allows clients to customize and expand the NetSuite package. Pricing is based on a base license fee with a per-user, per month model thereafter.

## NIMBLE CRM

Nimble CRM from Nimble caters businesses of all sizes and in a variety of different sectors.

Nimble CRM has been designed from the ground up to manage customer interaction, with a single platform created to integrate all aspects of CRM, and factor in organizational tasks and events from work calendars and diaries to improve efficiency and customer experience. It is ideal for companies both large and small which wish to streamline operations and perform research and analytics to maximise productivity.

Nimble CRM automatically syncs Google apps or Office 365 social interactions and contact systems so that users spend less time logging CRM data and more time can be dedicated to engaging with customers. Continuous updates on contact information are provided by Nimble, including social profile links to make tracking and logging critical data easier and more efficient. These tracking systems are also present in the email prospecting and sales aspect of the CRM software, whereby Nimble CRM provides tools to ensure marketing data is current and up to date, allowing for easy analytics and reporting functionality.

With a mobile app optimised for both Android and iOS, with hundreds of integrated third party apps, Nimble CRM is a cloud-based system compatible with all web browsers.

## NUTSHELL

Nutshell CRM is used by companies across a wide range of industries, including food and drink, retail and the financial sector. The software focuses on flexibility, ease of use, and mobile compatibility.

Nutshell CRM caters to companies of all sizes but is especially popular with high-growth startups who require their CRM to evolve with rapidly changing business needs. This is reflected in the software's three-tier pricing model. Nutshell's CRM is offered in three different packages - 'Starter', 'Pro' and 'Pro+', allowing companies to select the package that best suits them and scale up when extra functionality is required.

Features vary between packages, though Nutshell's emphasis on 'selling smarter' is present across all of them. Common to all three packages includes basic sales tracking and reporting, and integration with a number of widely-used business apps such as Google Apps, Zendesk, and MailChimp. At the higher end of the CRM packages, the Nutshell CRM offers more powerful reporting tools and additional sales process automation.

Nutshell pricing is structured per user per month. The CRM software is cloud-based, with native mobile apps available for both iOS and Android operating systems. For tablets, the Nutshell CRM has been responsively designed to run through web browsers.

## OPENCRM

OpenCRM is designed with mid-market businesses in mind and provides clients with a complete solution, avoiding the need to bolt on modules as and when required.

Full integration is at the heart of the software's design, making it ideal for firms looking to manage opportunities, sales, invoicing and projects all in one place. A dedicated team of consultants help clients scope out their requirements and on-site as well as virtual training is provided with every package.

Powerful financial and project management tools accompany the usual sales and contact management features, allowing users to seamlessly integrate invoicing, credit controls and account management. As a result, the entire sales process can be almost entirely automated; quotations, sales orders and commissions can all be managed within OpenCRM without the need for third-party software. OpenCRM also offer bespoke development, for businesses that require additional features that aren't available out of the box.

Offered as a cloud-based solution, OpenCRM can operate on desktop, tablet and mobile devices. A scalable pricing plan allows businesses to expand, although it is worth noting that the monthly subscription is offered on a per-site rather than per-user basis.

## PAGICO

Pagico CRM is a cloud-based task management and CRM tool designed for both teams and individual users. Its main functions are to organize information, keep staff informed and facilitate access to important data on the go. The main overlap with conventional CRM software is with its contact management function.

One of Pagico's key design features is an accessible and easy-to-follow UI. The organization of projects, clients, and general files is made easy by the prompt to keep archiving old material and reduce clutter. Instead of endless lists, the software presents future leads and projects as a timeline, so that employees can see priorities at a glance.

These interactive flowcharts link to the files and notes related to the event or client. One interesting aspect of the platform is its ability to cross-link files, so if you are putting together a product list, you can attach specifications to this as a file for salespeople to reference on the go. Everything can be organized simply using the tag browser systems, which helps navigate simply through your file system.

Those on the 'personal' plan (up to four users) can take advantage of a six-month free trial, with a subsequent one-off payment for unlimited access. 'Team' users pay a flat per month fee, which varies with the number of users.

## PIPELINEDEALS

PipelineDeals supply a CRM aimed at small to medium sized businesses. PipelineDeals CRM is designed to look and feel much like a spreadsheet solution and is aimed at sales teams looking to migrate from in-house spreadsheets to a CRM package.

Sales pipeline management, deal tracking, contract management and automation are all offered as standard with PipelineDeals and a limited number of third-party software, such as Microsoft Office, can be easily integrated. Connect is PipelineDeals' latest integrated workflow feature, which allows users to connect any IMAP service and synchronise email and calendars with ease.

A reports dashboard allows users to create and review charts on sales figures and activity, all of which are exportable to Microsoft Excel. PipelineDeals CRM is also available on Android and iOS via dedicated PipelineDeals mobile apps at no extra cost. These include mobile functionality such as SMS text reminders and access to calendars and other sales pipeline features.

PipelineDeals have premium software packages, these offer a dedicated account manager, advanced security and a sales acceleration feature, designed to speed up the sales-cycle and aid users in follow-ups and lead generation.

A support team is on hand for 12 hours a day (EST) for PipelineDeals' CRM users, providing help and support over the phone or online. There is also an online help centre and active user community. Out of hours, users can log support tickets which are subsequently picked up by the team the following day.

## PROJECT-SALESACHIEVER CRM

Project-SalesAchiever CRM is a software package tailored towards the construction and engineering industries.

Project-SalesAchiever CRM has been developed specifically to be used by construction companies both in the office and in the field. It allows sales staff to manage construction specific sales processes via an intuitive workflow and interface. The front end user is at the heart of the design and ease of use is an important facet.

Data loading tools are geared up towards importing data from project lead information providers such as Dodge and Reed. Another key feature is the powerful 'drag and drop' interface that allows users to add functionality to CRM tool as and when required. Project-SalesAchiever has also been designed to integrate easily with third-party ERP solutions including Avante, SAP, and Oracle.

The CRM solution can be hosted in the cloud installed on-premise and will run on any browser enabled handheld or desktop device. Project-SalesAchiever CRM pricing is flexible; firms can select either a monthly subscription, which is based on a per-user, per month structure, or pay up-front for the package.

# PROSPERWORKS

## PROSPERWORKS

ProsperWorks caters to businesses of all sizes, delivering tools to contain all aspects of the customer relationship process in a single platform.

Designed from the ground up to integrate with Google apps, ProsperWorks is suited for companies who already contain much of their workload within Google products. As a result of this focus, ProsperWorks positions itself as a universal CRM capable of being adapted to any business, reducing complexity and streamlining the user experience to improve productivity.

As the only CRM recommended by Google, ProsperWorks bolsters this relationship by providing a purpose-built Gmail Chrome Extension along with full integration of all Google Apps, ensuring users experience the most efficient platform bringing together their current systems into an easily navigable format. ProsperWorks automates customer research and eliminates painful data entry through data capture and tracking systems, which, along with Google apps integration aim to make processes simple, visible and actionable.

With a Mobile Suite across iOS and Android, including mobile and tablet optimization, ProsperWorks is a cloud-based system with a three-tier pricing structure aimed at small teams, growing businesses, and large companies respectively.

## REALLY SIMPLE SYSTEMS CRM

Really Simple Systems CRM is aimed at small to medium-sized clients with a B2B focus.

As such, it has been intuitively designed to allow small sales teams to get up and running within minutes. The CRM is scalable and businesses pay only for the functions they require; adding users and features as their sales team grows. Custom reports, integration with accounting software, plus free service and support are all available as standard.

Key features include a 'two-way MailSync', which incorporates email correspondence with clients into the CRM system, allowing users to view their own interactions as well as the interactions of other members of their team. Microsoft Calendar and Google Contacts can also be integrated.

Really Simple Systems CRM is a cloud-based solution, available on desktop, tablet and mobile devices. The basic package is available free of charge for up to two users, with additional users and features available for a monthly fee, with no annual contract required.

### Software Features

## SAGE CRM

Sage CRM is a CRM solution aimed at small, medium and large businesses. It is offered as a stand-alone solution or can be integrated with other Sage products.

An interactive dashboard acts as a central hub for Sage CRM's sales features, allowing users to monitor and manage opportunities, reports, and forecasting from one place. Managers and directors can access KPIs and evaluate progress reports in the business accelerators suite and territory management features break down performance into regions and sub-regions.

A key feature of the Sage CRM package is the detail in which it allows users to create and evaluate marketing campaigns. Every element of a campaign can be tracked, evaluated and the results shared via actionable reports with the wider sales team.

Sage CRM is offered as both cloud and on-premise solutions; the cloud subscription pricing is based on a per-user, per month basis while the on-premise pricing is billed per-server and per-user. The software can be accessed on a PC or via one of the Sage mobile apps for Android, iPhone and Windows 8.

## SALESBOX

Salesbox was created for collaborative sales teams who are looking for a mobile-friendly, agile sales tool that is centered around “people, numbers, and focus”. Marketed as an alternative to clunkier traditional CRM packages, Salesbox aims to gather the data required for its users to make smarter sales decisions.

Salesbox allows sales teams to add accounts, make notes and book appointments with contacts exported directly from Gmail and Outlook, avoiding the need for manual entry into a separate database. All inbound and outbound communication can be recorded in under the relevant contact, and all this information can then be synced with Google and MS calendars. Tasks can be clearly assigned to individuals and teams, and Salesbox CRM also includes predictive analytics, territory and quota management, plus sales gamification to boost team motivation.

Salesbox CRM can be delivered on-premise or as a cloud package, and has native iOS, Android and web apps. It is highly customizable and is suitable for companies of any size user base. There are three cost options available - ‘super’, ‘ultra’ and ‘ultimate’ - each respective tier offers more extensive features.

Training, implementation support, and integration services are available to Salesbox customers during installation of the software.

## SALESFLARE

Salesflare CRM is a software solution aimed at sales teams in organizations of all sizes.

The product is designed to minimize the amount of time sales staff spend inputting data into their CRM solution; Salesflare claim to reduce time spent on data entry by over 70%. It is, therefore, ideal for teams that find themselves spending a lot of time manually entering contact information into their sales software or have large existing databases of client information.

The product's key feature is its intelligent, automated data collection engine, which gleans client contact information from the internet, email accounts and existing databases. The engine automatically populates the software's contact book, saving teams vast amounts of time. Salesflare's software collaboration tool is another useful feature. It records detailed customer interaction information, so teams can automatically track the conversations they are having with their clients.

Salesflare can be used on mobile devices via their Android and iOS apps.

## SALESFORCE

Salesforce is a CRM cloud-based solution which caters towards companies of all sizes – it is a single platform intended to manage all aspects of sales, service, marketing, and analytics, through area specific “Clouds” in order to meet specific business needs.

With separate “clouds” for each arm of their CRM, Salesforce provides solutions suited for companies who wish to engage in different aspects of the modern consumer space while maintaining the ability to segregate operations between teams, avoiding over-complication while still allowing for cross-communication. Salesforce offers different services through separate price plans, so businesses only looking for partial CRM functionality can adjust their service level and costs to fit their needs.

Salesforce’s Community Cloud enables customer self-service and effective management through an online community, giving customers the freedom to access information and advice concerning their business with the company. Through this, they aim to reduce the need for dedicated customer service and improving the overall experience. Through Sales Cloud, Salesforce aims to make selling easier and more effective through predictive lead scoring which recommends the best action to boost revenue and productivity.

A fully cloud-based system, Salesforce is accessible through any device, including iOS and Android, with customizable pricing on a usage basis.

## SALESNET CRM

Salesnet CRM is a configurable CRM package aimed at small to medium sized businesses in the B2B marketplace, particularly those hoping to improve the efficiency of their sales process.

Sales force automation is the central theme of the Salesnet CRM package. Coupled with visual dashboards, pipelines, and forecasts, Salesnet offers a 'CRM made simple' package. This incorporates marketing automation and project management features, such as email marketing and campaign management, alongside its sales functionality, aiming to bring everything together under a single user-friendly software solution.

A key feature of Salesnet CRM is its configuration ability, the customization process does not require technical prowess or knowledge of coding languages. The Salesnet Process Builder, for example, is a patented engine that can be adapted to the client's operations via customizable workflows and smart-forms. Advanced customizations are possible via an XML Web Services API and third party integrations are supported.

Salesnet CRM is available in three packages; Express, Professional, and Enterprise. All are cloud-based solutions, available on desktop and mobile devices. The first two are billed annually on a per-user, per-month basis. The Enterprise solution offers clients dedicated support, custom functionality and enhanced security operations and Salesnet request customers to contact them for a quotation.

## SAP CRM

SAP CRM is a customer relationships solution from SAP designed to provide employees with customer insights and processes so they can deliver consistent and personalized customer experiences across all channels.

SAP CRM places itself in the market as software designed specifically for on-premises management. Intended to increase customer experience through adding a personal touch to each interaction, SAP CRM is suited for businesses of all sizes who wish to improve customer relations while also providing real-time data for analysis for driving performance and sales.

By equipping customer service agents and sales operatives with the tools to deliver fast, accurate service, SAP CRM brings together all customer interactions under a single, browser-accessible platform to ensure each customer is treated appropriately based on their individual experience with the company. Furthermore, with marketing capabilities to manage all aspects of the sector – including e-marketing, campaign automation, and digital asset management – SAP CRM provides a full system to increase productivity and revenue across each related business channel.

SAP CRM is an on-premise software solution with mobile access via a variety of devices.

## SOFFRONT CRM

Soffront CRM is a customizable system that aims to automate the sales, service and project aspects of small to midsized businesses.

Soffront CRM is suitable for sales teams aiming to speed up lead conversions and optimize their sales processes. The CRM is highly modifiable and comes equipped with intuitive drag and drop customization tools that allow non-technical users to develop solutions to meet the needs of an organization's processes and workflow.

One of Soffront CRM's key packages is an auto-generated task list that sets out a salesperson's upcoming day. This feature allows users to drill down on tasks and subtasks to look up lead information and mark off tasks as completed as they progress through their day. Quotations can also be generated in the system and sent out to customers on company headed documents.

Soffront CRM is offered with a dedicated implementation plan whereby a Soffront expert is assigned to a client in order to minimize costs and tailor the implementation. The CRM solution is modular, meaning customers only pay for the functionality they require.

## SUGARCRM

SugarCRM caters towards businesses of all sizes – from sole traders to enterprises with over 10,000 employees - in a variety of different sectors.

SugarCRM delivers a personalized user experience that aims to be immersive, engaging and intuitive. By fusing the simplicity, mobility and social aspects of a consumer app with the business process optimization of conventional CRM, SugarCRM is well-suited for use by businesses looking to integrate existing enterprise software within a robust system that allows employees to improve customer experience.

Designed with the individual in mind, SugarCRM provides the tools to make customer interactions enjoyable and productive. Through embedded collaboration tools, separate departments are able to increase engagement and service levels, and contextual analytics sourced both externally and internally allow users to drive more actionable insights.

Deployable on-premise or cloud based, SugarCRM is deployed by more than 1.5M individuals in over 120 countries and 26 languages. A fully customizable platform with mobile access through Android and iOS, SugarCRM has three levels of pricing on a per user per month basis, meaning it can be scaled appropriately to individual business needs.

## SUITECRM

SuiteCRM is an open-source CRM application, meaning it is free to download, modify and distribute. It is aimed at businesses that desire control over their CRM customizations and a move away from traditional subscription-based CRM packages.

SuiteCRM is designed to cut implementation costs and offer clients complete freedom over their implementation and data storage. It is scalable and continually improved; a quarterly release cycle means users are kept up to date with the latest features all year round.

The package comes with three modules; workflow, sales, and portal. The workflow module is designed to streamline repetitive tasks, manage upcoming activities and model business processes while the sales module is dedicated to sales-related administration, such as contract renewals and quotation generation. Finally, the portal acts as a central hub for teams to manage their client interaction via a secure website.

SuiteCRM is built using cloud technologies and there is no software for users to install. Coupled with a dedicated mobile client, this means the system is available around the world and on any device. Extra features such as integration with third party software or client specific customizations are also available at fixed price. Support packages are provided on an annual subscription basis.

### Software Features

## SUPEROFFICE CRM

SuperOffice CRM comes as either a complete solution or a number of role-based packages. Clients choose one or more packages depending on their requirements or can opt for the 'Complete CRM' solution, which incorporates sales, marketing and service in one space.

The core features allow users to centralize their customer interactions, synchronize their calendars and integrate mail from Microsoft Outlook or Google mail. Team availability tracking, document collaboration and project management tools are also included in the core package.

Features in the sales package include a virtual sales secretary, which keeps users updated with sales activities, opportunities and tasks that are overdue. The marketing suite offers functionality that aims to personalize emails, marrying CRM with the latest marketing techniques. A unique ticketing system streamlines the communication process, making interaction tracking simple.

SuperOffice CRM is available as a cloud or on-premise solution, both of which are accessible from desktop and mobile devices. The cloud version of the software comes with a catalog of apps and integration with third party software is also supported. Pricing is structured on a per-package, per-user basis with a 12-month minimum term contract, with a flexible billing period.

## ZOHO CRM

Zoho CRM is a cloud-based software package aimed at small to medium sized businesses. Companies can download the software for free for up to 10 users, making it suitable for firms new to CRM.

A key feature is Zoho CRM's multichannel support, which allows users to keep track of all their client interactions in a single place, regardless of whether they take place online, over the phone or in person. Moreover, the Phonebridge functionality gives users the ability to start calls and view client information from the same place.

SalesSignals is part of a new Zoho CRM release that allows users to reach out to sales prospects in real time. A live prospects feed allows users to watch their customers interact with their marketing campaigns and engage them in conversation.

The free version of Zoho CRM is available indefinitely for up to 10 users and clients only pay for additional users or features beyond the core set. The premium packages are available on a per-user, per month pricing structure and include extra functionality such as macros, inventory management, and customization. All versions of Zoho CRM are available via iOS and Android applications.
